

Actionable Imagery

Gain an advantage over your crop

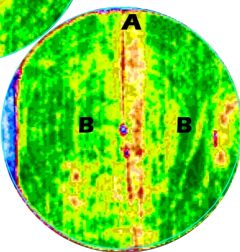

Imagery insights lead to actions that improve efficiency, protect crops, and strengthen ROI

Monitor Input Trials

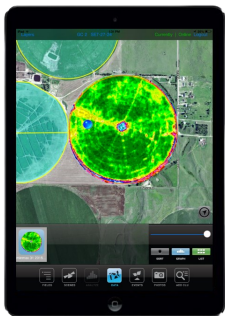

Early Season

Late Season

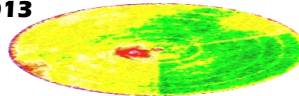

Hybrid B outperformed Hybrid A

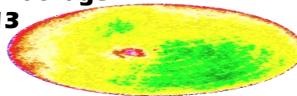

In Season NDVI Imagery can show you changes in your crop up to **TWO WEEKS** before it is visible to the naked eye. Utilize that head start to be proactive in your management decisions.

Problem Monitoring

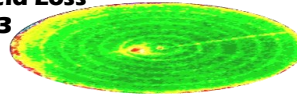

Well Dropping Off
June 25, 2013

New Nozzle Package
July 21, 2013

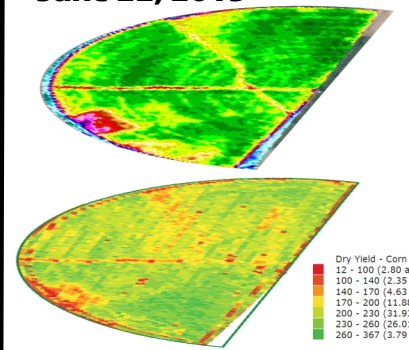

Reduced Yield Loss
Aug. 4, 2013

Easily ground truth the imagery using the Landscout App to navigate to areas of concern in the field.

In Season Yield Map NDVI Image June 22, 2015

2015 Corn Yield
