

# *Insightful* **Yield Analysis**

## A Report Card for Your Field

Crop Quest agronomists routinely utilize precision ag software required to assist with your yield mapping needs. Innovation is at the heart of our company; that's evident in our weekly reports. Each employee-owner at Crop Quest uses SST Summit; Summit helps us create those weekly field reports and enables us to work with a multitude of yield monitors.

### **Interpret your yield data!**

- ✔ Analyze the variation in crop yields and evaluate potential sources (irrigation issues, nutrient deficiencies, variety differences, . . .)
- ✔ Create normalized yield maps, highlighting areas of consistently low and high yield
- ✔ Harness historical yield trends to establish yield goals and improve VR nutrient applications
- ✔ Learn more about the fields
- ✔ Benchmark areas and strive to find what is limiting yield
- ✔ Design management zones allowing for VR applications

**Go beyond a pretty picture; develop an action plan with objective consultant assistance.**

Ask about our services for  
Producers ✦ Farm Managers ✦ Landlords

With Crop Quest's team of Agronomists and Precision Ag Specialists, you can be confident your information is being handled by professionals who understand farming - from soil to software.
