

CROP QUEST

Maximize Tax Deductions for Farmland with Crop Quest

A Tax Deduction Many Land Buyers Overlook

Many buyers don't realize excess fertility is a depreciable asset, just like irrigation or grain storage. This deduction can save hundreds of dollars per acre.

Help Your Clients Save

Ensure your clients claim eligible tax deductions for excess fertility, reducing their taxable income and increasing savings.

Who Qualifies

- Buyer did not farm the land last season
- Grid soil sampling confirms excess fertility
- Nutrients are depleted by crops over time

Make Sure Your Clients Aren't Leaving Money On The Table

How Crop Quest Can Help Accountants

Expert Soil Analysis

We conduct precise grid soil sampling to identify excess fertility, providing data you can use to help your clients claim appropriate deductions.

Tax Deduction Eligibility

We help clarify which clients can benefit from excess fertility tax deductions, ensuring they don't miss out on valuable opportunities.

Comprehensive Reports

Crop Quest provides detailed reports with actionable insights, making it easier for you to present clear evidence to your clients and tax authorities.
